

# KITCHEN PERFECTION

## IT'S THE RESULTS THAT MATTER

Yes, our products are designed to look beautiful, and of course they're built to last. But our ultimate goal is to make your food taste great. We don't do technology for technology's sake.

A Sub-Zero refrigerator is controlled by a sensitive microprocessor, because that way your food is always stored at the perfect temperature. A Wolf dual-stacked burner has a refined control that can go from the lightest simmer to a furnace-like heat in seconds, because that's what a cook needs.

Our equipment is built to professional standards, but you don't need to be a professional to appreciate them. Whatever your level of skill in the kitchen, our easy-to-use technology is designed to make cooking a pleasure, inspiring you to cook with confidence and to achieve perfect results, time after time. After all, as the saying goes, the proof of the pudding is in the eating.

SUB-ZERO  
THE PRESERVATION SPECIALIST

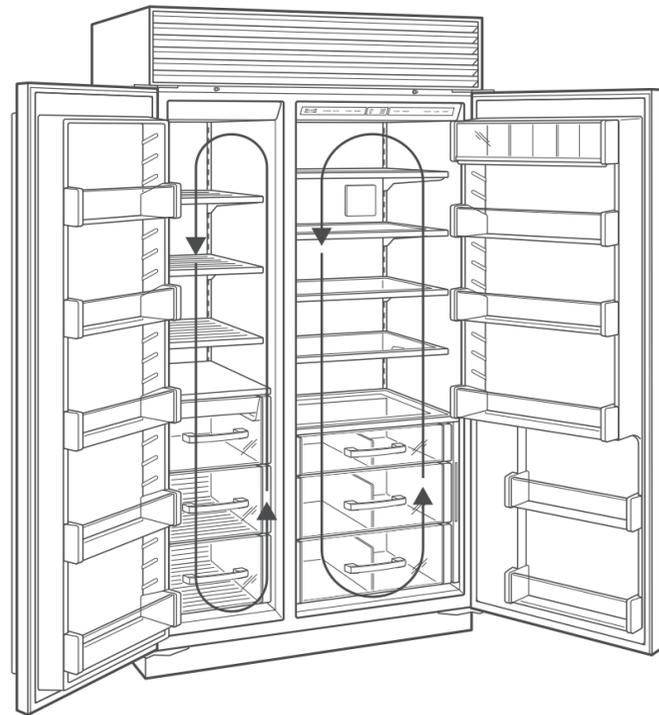

We are experts at refrigeration, combining advanced technology and outstanding build quality to deliver perfect results. Our dual refrigeration system keeps fresh food fresher and preserves frozen food for longer, minimising waste and maximising flavour. And despite their often impressive size, our units are so energy efficient they use less power than a 100-watt light bulb.

## DUAL COMPRESSORS ENSURE OPTIMUM STORAGE THROUGHOUT

Fresh and frozen foods need different environments to keep them at their best. Frozen foods need frigid, dry conditions, while fresh foods need chilly, humid air to keep them from drying out. Yet most fridge/freezers circulate the same super-dry air from the freezer round the whole unit, taking with it undesirable smells and flavours that can taint and spoil your food. Not Sub-Zero.

Our dual refrigeration system means that both the freezer and the fridge have their own independent sealed system, each run by its own compressor. What does that mean? It means that your ice cream stays creamier, your salad doesn't wilt, your fridge never has that stale metallic smell, and your ice never tastes of fish. It's not rocket science. All it takes is a little more thought, and a lot more care.

Because each side has its own compressor, both fridge and freezer have the optimum food storage conditions for food preservation, plus unwanted food smells aren't circulated between the two.

## SUB-ZERO COLLECTION

The Sub-Zero collection is versatile and stylish enough to look at home in any kitchen, whether contemporary or traditional. Because we've been doing this longer than anyone else, we know more than anyone else, and that shows in the breadth and depth of our range. We have styles and configurations to appeal to every taste and to suit any look, with a wide choice of sizes to fit every kitchen.

There are three lines: the built-in line, for the classic Sub-Zero look, with its sleek lines and iconic design touches; the Sub-Zero PRO line, a bold style statement second to none; and our Integrated line, designed to totally disappear into your kitchen so that nothing gets in the way of your creative vision. Each has its own distinct look, but all have the same obsessive attention to detail and build quality that makes Sub-Zero a class apart.

### BUILT-IN

This range offers the classic Sub-Zero look and is designed for those who want their units built into their kitchen, but still want to see the products' handsome lines and sleek hinges, and the stylish sheen of heavy-gauge stainless steel. Alternatively you can customise the built-in units with your choice of finish or with Sub-Zero classic stainless panels, either to match or act as a counterpoint to surrounding cabinetry.

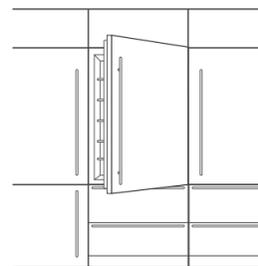

### PRO

The height of industrial chic, the PRO is more sculpture than refrigerator. Crafted from stainless steel inside and out, it is the ultimate in food preservation technology. Built to keep your food in ideal conditions at all times, its powerful presence will be a talking point of any kitchen. Available as built-in or free-standing.

### INTEGRATED

Totally integrated with your cabinets, with no visible hinges or grilles, these are designed to blend seamlessly with your kitchen, matching your other cabinetry so perfectly that only you will know where they are. They are also flexible enough to be placed wherever you need refrigeration or wine storage, such as a dining room, study, den or bedroom. Completely bespoke, the quality of the cabinet-making is exceptional.

Freezer (ICB700TCI) and Wine  
Preservation (ICB427RG)

## SUB-ZERO BUILT-IN

Sleek clean designs, exceptional materials and that unmistakable louvred grille. Our built-in units come in many configurations and a wide variety of sizes, but they all make a statement. Whether you choose our trademark stainless steel doors or bespoke cabinets to match your kitchen, our units are perfectly at home in traditional or contemporary designs. They naturally become a focal point of any kitchen.

Sub-Zero's trademark steel doors and louvred grille combine industrial chic with the unmistakable stamp of quality.

Sub-Zero Built-in All Refrigeration (ICBBI-36R/S) and All Freezer (ICBBI-36F/S) arranged side by side with a dual wide grille

Just like the bold exterior, the whole interior of the fridge and its drawers is sculpted from stainless steel.

## SUB-ZERO PRO

As much a sculpture as a fridge, the Sub-Zero PRO is the ultimate kitchen style statement. Crafted entirely from heavy-gauge stainless steel, it is also available with a UV-resistant glass door, so you can see the workmanship inside and out. The quintessential refrigerator, it is a masterpiece of functional design, built to preserve your food in ideal conditions at all times.

with glass door (ICB648PROG)

## SUB-ZERO WINE PRESERVATION

Great wine needs to be nurtured and cared for to enjoy it at its best. Sub-Zero wine storage units are designed to keep your finest wine in perfect condition by keeping it in perfect conditions. Sub-Zero understands the four enemies of wine – temperature, humidity, light and vibration – better than anyone, and painstakingly creates equipment that protects your wine from each one. Crafted from stainless steel, with UV-resistant glass, cherry wood slats and smoothly gliding shelves, its two independent storage zones always maintain the ideal temperature and humidity. After all, when it comes to wine, it's what's on the inside that counts.

## WHEN YOU BUY THE BEST, YOU WANT IT TO STAY THE BEST

It's often said that there is no such thing as a great wine, only great bottles of wine. That's because quality varies so much from one bottle to another, largely as a result of varying storage conditions. Sub-Zero carefully designs its wine preservation units so that you're never disappointed. Much more than mere coolers, they provide the perfect storage conditions, protecting against the adverse heat, humidity, light and vibration that can damage your wine.

Two independent storage zones, each sealed and digitally controlled, allow you to simultaneously maintain perfect cellar and serving conditions in the same unit. Microprocessor control maintains even temperatures to within one degree of your presets. The ultraviolet glass panel filters out the harmful rays that can cause premature aging. The quiet compressor lets wines rest undisturbed, without the vibration that can harm delicate wines. Shelves glide out smoothly, providing access without agitation. The result? Perfect conditions, and perfect wine.

WOLF  
THE COOKING SPECIALIST

Wolf has been building cooking equipment to satisfy the most demanding professional chefs and domestic cooks for more than 70 years. Hand crafted from superb materials, these are clearly cookers that are built to do a job – and they do it to perfection. From the rugged good looks of our ranges, to the sleek lines of our new E Series ovens, our equipment is designed to inspire you to cook with confidence with a wide range of options to suit any kitchen and cooking style.

Wolf controls are designed to be efficient, intuitive and extremely precise.

## CONTROL

Classic design, outstanding build quality, perfect results. With a Wolf range, you're always in total control of your cooking. Dual-stacked burners offer pinpoint power and performance, delivering the exact heat you need, from extremely low flame for gentle simmering to a furnace-like 16,000Btu heat for searing. And with a concealed electronic touch-sensitive control panel that rotates when the range is in use, even the finest adjustments are always at your fingertips, giving you the control you need to cook with confidence.
